

Carbon Reduction Plan

OscarTech UK · Version 4.1 · Published July 2026 · PPN 06/21

Supplier Name	Company Registration	VAT Number
OscarTech UK	09196814	257256095
Original Publication	Next Review Date	Net Zero Commitment
May 2026 (v4.0)	May 2027	By 2043

VERSION 4.1 ADDENDUM

This update amends Section 3 (Methodology and Reporting Boundary) to add the required Employee Commuting Scope 3 disclosure, in response to an NHS Supply Chain tender clarification dated July 2026. All other sections are unchanged from Version 4.0.

1 Commitment to Achieving Net Zero

OscarTech UK is committed to achieving Net Zero greenhouse gas emissions by **2043** across Scope 1, Scope 2 and applicable Scope 3 emissions.

OscarTech UK operates an annual Carbon Reduction Plan publication cycle, with plans reviewed and updated each October as part of the company's ESG governance framework.

- Net Zero directly controlled emissions by 2040
- Net Zero supply chain emissions by 2045

Our previous Carbon Reduction Plan established our Net Zero commitment and baseline emissions reporting.

2 Organisational Environmental Commitment

OscarTech UK integrates sustainability into:

- Procurement and supplier selection
- Logistics and distribution planning
- Product lifecycle management
- Packaging and waste reduction
- Business travel and hybrid working policies

Environmental performance is monitored at Director level and incorporated into corporate governance and risk management.

3 Methodology and Reporting Boundary

Emissions are calculated and reported in accordance with the GHG Protocol Corporate Standard, UK Government GHG Conversion Factors, SECR requirements, and the PPN 06/21 Technical Standard.

The Carbon Reduction Plan covers all UK operational activities under the OscarTech UK company registration.

Scope 1 — Direct Emissions

- Company vehicle fuel usage
- Direct fuel combustion at operational locations

Scope 2 — Indirect Energy Emissions

- Purchased electricity consumption
- Energy used at operational premises

Scope 3 — Value Chain Emissions (Required Categories per PPN 06/21)

In line with the PPN 06/21 Technical Standard, OscarTech UK reports against the five required Scope 3 categories:

- Upstream and downstream transportation and distribution
- Waste generated in operations
- Business travel
- Employee commuting

Additional relevant category also reported: **Purchased goods and services.**

EMPLOYEE COMMUTING — DATA AVAILABILITY STATEMENT

Employee commuting emissions data is not currently available. OscarTech UK has not previously conducted a formal employee commuting survey, and the journey mode, distance and frequency data required to calculate this emissions subset has therefore not yet been collected.

OscarTech UK will implement an employee commuting data collection process during the 2026–2027 reporting period. Employee commuting emissions are expected to be calculated and included from the Carbon Reduction Plan published following the October 2027 annual review.

Scope 3 remains the largest emission category due to the nature of medical supply distribution and logistics.

4 Emissions Footprint

Baseline · October 2023 – October 2024

Total Emissions: 399,323 tCO₂e

Current · October 2024 – October 2025

Total Emissions: 352,370 tCO₂e

This represents an approximate **12% reduction** in total emissions compared to the baseline reporting period, demonstrating early progress in operational efficiency, logistics optimisation and supplier engagement initiatives.

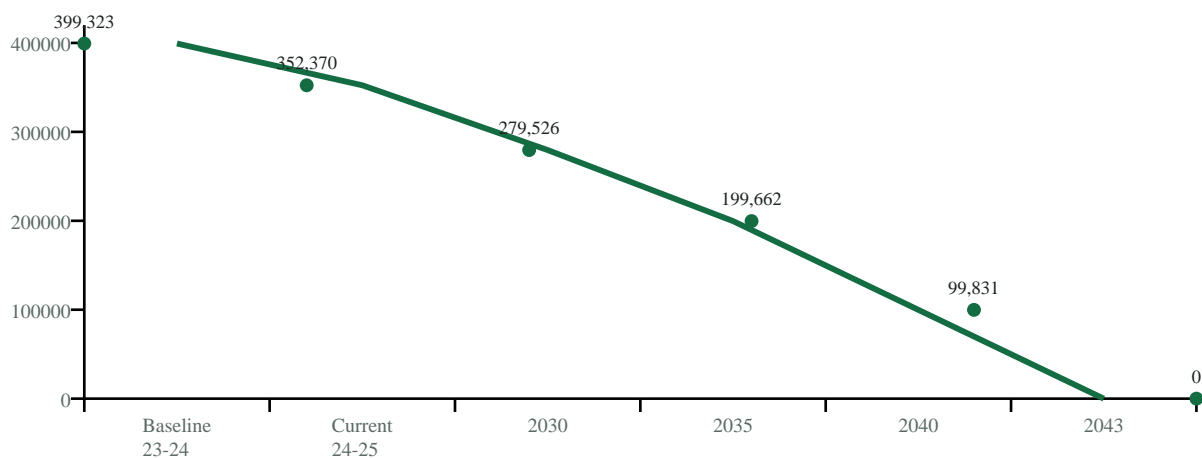

5 Carbon Reduction Targets

Organisation-wide reduction targets against baseline:

2030	2035	2040	2043
30% reduction	50% reduction	75% reduction	Net Zero

6 Emissions Reduction Pathway

Total emissions (Scope 1, 2 and 3 combined) against the baseline, current reporting year, and organisation-wide reduction targets to Net Zero by 2043:

The 2023–2025 figures represent actual calculated emissions based on internal ESG reporting processes. Figures from 2030 onward represent target trajectory, not actuals.

7 Carbon Reduction Initiatives

Energy & Facilities

- Renewable electricity transition
- Smart energy monitoring rollout

Fleet & Travel

- EV transition roadmap
- Remote working and travel optimisation

Supply Chain

- Supplier sustainability assessment
- Packaging reduction programme
- Digital documentation transition

Circular economy initiatives remain part of long-term sustainability strategy.

8 NHS Net Zero Supplier Alignment

Sustainable Procurement

- Environmental performance review of suppliers
- Preference for low carbon manufacturers

Low Carbon Logistics

- Delivery consolidation
- Route optimisation
- Reduced air freight reliance

Product Lifecycle Support

- Promotion of repair and reuse services supporting NHS waste reduction goals

9 Social Value and Environmental Impact

- Supporting NHS waste reduction objectives
- Extending product life through repair-first service model
- Supporting UK-based distribution networks
- Reducing paper consumption through digital-first documentation

10 Measurement, Reporting and Governance

- Measure emissions annually
- Review performance quarterly
- Publish updated CRP annually each October
- Maintain Board level sustainability oversight

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21, the GHG Protocol Corporate Standard, SECR reporting requirements and the NHS Net Zero Supplier Roadmap.

OscarTech UK does not operate a formal Board structure. This Carbon Reduction Plan has therefore been formally reviewed and approved by the Company Director in accordance with PPN 06/21 requirements. Signed on behalf of the Supplier: OscarTech UK.

Date	Version	Changes Made	Approved by Director
13/05/2026	4.0	Publication date updated, governance wording updated, annual review and approval reconfirmed.	Adnan Shabbir
03/07/2026	4.1	Added explicit Employee Commuting (Scope 3) disclosure to Section 3, stating reason for current data unavailability and expected inclusion from the October 2027 CRP.	Adnan Shabbir
